5 maturity levels

Scenarios

Assurance assessments can be tailored to any transformation stage or environment. This includes a set-up, general maturity overview, tollgate checkpoints, pre-go-live and post Implementation reviews

Methods

Workspring is highly qualified and has developed its Delivery Assurance Assessment Model using a range of experience and methods training. Our assurance assessments utilise and reference where applicable MOR, MOP, PMI Assurance, PMBOK Assurance, ISO9001, ISO 21502, DMAIC Delivery lifecycles, The Agile Manifesto & Strategic Lean

Approach

Any assessment will be tailored to the particular scenario, scope and overall objectives. Generally, there is a combination of staff surveys, detailed interviews, daily observations and detailed document / tool analysis conducted to produce an assessment outcome

Outcome Standards

Assessments are standard and repeatable in nature and can be aligned to global maturity indices which enable benchmarking and trends to be monitored over time.

Tools

Workspring uses office 365 standard tooling and technology (MS Forms, SharePoint and Power BI) to power any assessment. This makes it simple for our clients to take ownership of outcome artefacts and learn to conduct internal assessments ongoing

Reduce Delivery Cost ● Improve Delivery Speed ● Improve Outcome Quality ● Improve Staff Capability
